

Guiding You Through

ISO 9001:2000 **Transition From 1994**

Six Point Plan

REGISTRATION GUARANTEED!

CONSULTING & TRAINING

THE NEW ISO 9001:2000

Since your company achieved registration for ISO 9000, you may feel that the expected benefits have not materialized. Many companies have had the same experience.

The ISO standards experts realized the parameters had to be improved. ISO 9001:2000 is the result.

This revised standard is more streamlined and user-friendly. It emphasizes customer satisfaction, and continuous process improvement.

It encourages the development of **simpler and friendlier systems**, improving the flow of work, while dealing with **less actual paper work**.

Your staff will welcome this upgraded management tool.

These 5 Key Processes Replace 20 Elements in the Old System.

- Quality management
- Management responsibility
- Resource management
- Product realization
- Measurement, analysis and improvement

This new ISO 9001:2000 standard replaces ISO 9000 1994. In addition to being a simpler system to manage, the new standard is in alignment with ISO 14000, the Environmental Standard.

ISO 9001:2000 will enable you to establish a measurable system that ultimately **will improve your bottom line**.

ISO 9001:2000

TRANSITION FROM 1994

SUGGESTED TRAINING

SUGGESTED CONSULTING

UNDERSTAND THE NEW ISO 9001:2000	Learn the new structure and the key changes introduced by the new standard	ISO 9001:2000 Upgrading from 1994 (The coordinator)	—

HOW GRT CAN HELP

Our experienced team has developed a unique six-step transition package that **guarantees** your successful ISO 9001:2000 registration. A program tailored to your specific company provides a smooth transition to the new standard.

GRT's expert consultants help assess your current system, develop a transition plan **that meets your budget**, and speed you on your way to a guaranteed successful upgrade.

You **save time and resources** in achieving your new registration, by taking advantage of GRT's experience and proven track record.

We have taken over 100 companies to ISO 9000 registration, including many that have already met the new ISO 9001:2000 standard.

The old standard becomes obsolete at the end of 2003. The sooner you upgrade, the sooner you will start to reap the benefits of the new management system. **CALL US TODAY!**

Thanks, GRT

Without GRT, this achievement would not have been possible.

J.P. Trembley, V.P. Royal Canadian Mint

I would like to thank all the staff at GRT for their assistance, support and encouragement leading up to and including the audit, to achieve Registration with zero non-conformances.

Gerry Caven, Q.A. Manager, T.I. Group Automotive Flexibles

To a great extent, this achievement of implementing a quality system was made possible with the expert consulting and training assistance provided by GRT.

J.M. Bobyk, President, Thermadyne Canada

On behalf of the management and employees, we wish to express our deep appreciation of the excellent consultation and training services rendered by GRT, to prepare our company to develop and implement a quality system to meet the requirements.

J. Jackson, General Manager, Anti-friction Enterprises Ltd.

Our cooperative association with GRT has proven most successful. GRT was a great help – keeping us focused and on track.

Bill Chamberlain, Q.M.R. Commercial Babcock

GRT went above and beyond to ensure we were successful in achieving certification.

Randy Clark, Eomac Ltd.

I'd like to thank GRT for putting together an excellent program.

Marc Barei, Canadian Metal Ad. Corp.

GRT have been a very positive and necessary addition to our ISO 9001:2000 registration process. We wouldn't have done it without your assistance.

Bill Quesnel, Wearcheck Canada Inc.
