

GRT Services

Guiding You to Success

In many companies, it takes an outside-experienced, outside-trained eye to pick up some of the processed or procedures that need improvement. Our experienced and trained staff can help you put together a program to achieve your goals-- whether registration or general business improvement. The program usually take the form of consulting along with seminars. Our online brochures and catalogue may have more of the information you're looking for.

Before you hire a consultant you should have a clear idea of your reasons for doing so. The reason for choosing GRT is simple: with easy-to-implement procedures delivered in a professional way, you can improve both client and employee satisfaction with improved business practices. Both will increase company profitability and opportunities for growth.

GRT offers consulting services in the following main areas:

- Lean & 5S
- ISO/TS 16949
- ISO 9000
- ISO 14000
- Automotive
- Business Improvement
- Six Sigma

About GRT

In 1977 GRT became the first Canadian company to provide guidance in Modern Quality Methods. Today, GRT continues to be a leading company, guiding organizations to success by implementing quality, productivity and environmental management systems.

- Learn what Lean is in simple terms
- Participate in simulations and workshops
- Develop easy implementation steps
- Understand Lean Toolkit

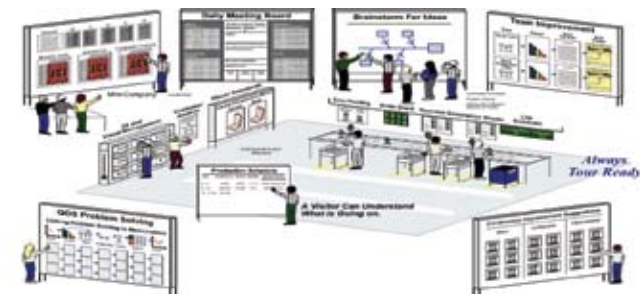

Needs Analysis - 1-3 Day(s)

- Lean opportunities identified
- Easy implementation steps listed
- Value Stream Mapping services & training

Full Project Implementation

- Full Lean Implementation on the shop floor or office
- Hands-on project management

Organized For Success

Flow: The evolution of your process from a tangled counter flow model, to a smooth linear path with minimal WIP.

5S Footprint: A visual method used to capture and preserve the best place for every operation and input.

Visual Management: Implementation of plant metrics, real time reports and counters to make production status 'glaringly obvious'.

Andon: A system of call lights, audible signals or similar ways of production employees to request material, technical or management support, without leaving their stations.
